## Associations

AIA Interprets Its Standards, *Staff*, p63, February.  
ARA—New Voice for Architects, *Staff*, p70, May.  
ASCE Considers Contract Practices, *Staff*, p130, June.  
ASCE Meeting Includes Sessions for CEs, *Staff*, p102, January.  
ASCE Nominates Contenders for Its "Outstanding Engineering Achievement Award," *Staff*, p78, February.  
ASHE: Its Purposes and Functions, *Charles M. Birmingham*, p80, April.  
At AICE's First Building Congress, *Staff*, p160, April.  
California Consultants Theme: Action Makes Progress, *Staff*, p78, March.  
CCCELS Studies Land Development Problems, *Staff*, p142, March.  
CCEA-CSPE Discuss Water Pollution, *Staff*, p157, March.  
CEAC Forum: What is Wrong With Package Deals?, *Staff*, p96, January.  
CECNJ Holds Annual Meeting, *Staff*, p80, June.

Construction Industry Cooperation, *Staff*, p122, May.  
CSI-AIA — Materials Evaluation, *Staff*, p76, April.  
EJC on Relations With Industry, *Staff*, p86, March.  
Engineers Must Cure Their Legislative Weakness, *Staff*, p58, April.  
IAT Explains Its Programs, *Staff*, p58, March.  
Legislative Conference an Eye Opener for CEs, *Staff*, p162, March.  
Master Plans in the USSR, *Staff*, p32, June.  
New England CEs & Architects Briefed on Electric Heat, *Staff*, p42, January.  
NSPE Plan — the Great Engineering Society, *Staff*, p116, February.  
PEPP Seeks More Dues. New Structure, *Staff*, p180, June.  
PC-CEC's 1965 Awards, *Staff*, p72, May.  
Registration Board Members Highlight SEASC Meeting, *Staff*, p114, February.  
Specs . . . Legal and Literary, *Staff*, p51, January.  
St. Louis to Host CEC National Convention, *Staff*, p50, April.

## NEW BOOKLET SHOWS HOW GLASS PIPE CUTS REPLACEMENT COSTS

Twenty-four-page booklet gives facts on Kimax® glass process pipe. Tells how it withstands corrosive chemicals and is tempered for extra strength—both features designed to practically eliminate pipe replacement. See how its transparency aids inspection. Get engineering details, easy installation techniques. Write for this free booklet today.

**OWENS-ILLINOIS**

### ON DOCKS AND DOCKBOARDS

**Modern Methods of Dock Design** — 16 page brochure developed in cooperation with ATA, TTMA and SAE, contains valuable information on dock design, driveway approach, dock aprons, etc.

**Adjustable Dockboard "Analysis" Brochure** — 8 pages describe operating sequences and needed safety and operating features.

Send for your copies today! Tear out and attach this ad to your letterhead.

How Do You Define a "Big Job", *Walter Toaspern*, p104, June.  
How Do You Figure Spacing of Highway Lighting Poles?, *L. Bertram Curtis*, p92, January.

## Exactel makes the best dam instruments you can buy..

Illustrated is a 175" Hg range Servomanometer to gauge the approximately 200 foot depth of the New Hogan Dam near Stockton, California. The employment of the purge bubble principle eliminates the need for a stilling well and provides a maximum of precision and reliability. The technique is also ideal for tank gauging; particularly of difficult liquids such as high temperature, etc.

Servomanometers are constructed from stock components in more than 3,000 configurations consisting of five standard ranges, five series, single or dual construction and approximately 70 options; designed for approximately 50 diversified fields of application — from laboratory and calibration service to rigorous outdoor industrial use.

**EXACTEL INSTRUMENT COMPANY**

## WHATEVER THE WEATHER

### THE BEST WAY TO THE ROOF IS VIA A BILCO SCUTTLE

For single or multi-story buildings, only a Bilco Roof Scuttle provides the fast, safe, direct route to the roof for maintenance, servicing or repairs. Bilco Scuttles are rugged, weathertight, spring balanced for easy opening and closing.

Bilco Scuttles are available in standard and special sizes, in a variety of materials to meet every requirement. Write for your catalog or see Sweet's for complete details.

AMERICA'S FINEST  
ROOF SCUTTLE

THE BILCO COMPANY

Men Reach Skyward in Building Cities, *Heinz Ulrich*, p89, May.

New England CEs & Architects Briefed on Electric Heat, *Staff*, p42, January.

Pedestrian Traffic Area (PTA) Lighting . . . Opportunity for Creativity in Design, *Svenn W. Bruun*, p106, April.

Prestress Strengthens Steel Girders, *E. I. Fiesenheiser*, p118, May.

Water Pressure Boosting Systems, *James S. Braxton*, p100, May.

Why Not Try Wall-Bearing Masonry?, *Richard M. Gensert*, p94, June.

WSD for Concrete Columns — Part 2, *Eli Czerniak*, p70, January.

WSD for Concrete Columns — Part 3, *Eli Czerniak*, p100, February.

WSD for Concrete Columns — Part 4, *Eli Czerniak*, p96, March.

WSD for Concrete Columns — Part 5, *Eli Czerniak*, p116, April.

### Economics

Accounting — "Overhead" or "Aid to Management?", *Raymond Stuart*, p112, April.

Construction's 1965 Economic Outlook, *William G. Dooly*, p76, January.

Enginomics, *Maurice B. Cook*, p112, February.

Time Lag . . . Hidden Cost Hazard, *Wilson V. Binger & Leonard S. Oberman*, p114, June.

### Engineer-Client Relations

At AICE's First Building Congress, *Staff*, p160, April.

CEAC Forum: What is Wrong with Package Deals?, *Staff*, p96, January.

Illinois CEs Meet with Contractors, *Staff*, p127, May.

Specs . . . Legal and Literary, *Staff*, p51, January.

Using the Media of Publicity, *Andrew Weil*, p52, May.

### Engineer-Government Relations

ASCE Meeting Includes Sessions for CEs, *Staff*, p102, January.

Do Politics and Engineering Mix?, *John K. Bright*, p117, March.

Engineers Must Cure Their Legislative Weakness, *Staff*, p58, April.

### History of Engineering

Engineering for the Citadel's *Seraph Memorial*, *Louis S. Booth*, p123, April.

Men Reach Skyward in Building Cities, *Heinz Ulrich*, p89, May.

The Citadelle . . . Hollow Engineering Accomplishment, *M. D. Morris*, p124, March.

### Foreign

Highlights of an Engineer's Tour Around the World, *Charles H. Lee*, p93, February.

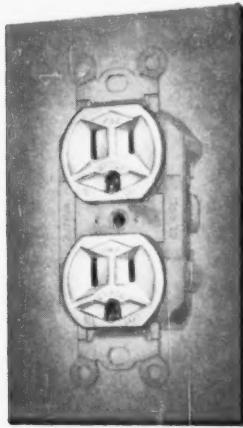

Master Plans in the USSR, *Staff*, p32, June.

75 Years of Leadership in the Electrical Industry

## For dust and moisture problem areas

HERE'S THE GROUNDING OUTLET TO USE WHERE OTHERS WON'T DO

Fabric reinforced Neoprene gaskets protect the P&S 6207 from dust and moisture at all times by wiping cap blades and providing positive closure. Cellular Neoprene mat under wall plate further seals against penetrating elements.

Like all P&S Super Outlets, the 6207 (15 amp. 125 volt) has individually recessed, reinforced contacts and a dead back safety feature.

Where to use it? Industrial plants, laboratories, workshops, garages, cellars, carpenter shops—in any areas where dust and/or moisture are problems. (This device is not recommended for unprotected outdoor areas.)

Want more information? Write Dept. CE 655.
